

# Conference for Undergraduate Educators

---

## ASMCUE General Information

Now in its seventeenth year, the ASM Conference for Undergraduate Educators (ASMCUE) gathers nearly 300 microbiology and biology educators for an interactive four-day conference. Educators come from colleges, universities and international institutions to learn and share the latest information in the biological sciences and education research.

The Conference program includes plenary, concurrent, poster, and exhibit sessions. Participants engage in formal and informal small group discussions between colleagues all focused on the same goal: to improve teaching and learning in the biological sciences.
